FULL STACK DEVELOPER

I am a passionate full-stack developer with hands-on experience in **Core Java, SQL, MongoDB, HTML, CSS, and JavaScript**. I have begun working with **Spring Boot, REST APIs, Postman**, and development tools like **Git, GitHub, and VS Code**, and have successfully completed a project using Spring Boot.

TECHNICAL SKILLS

Programming Languages : Java, C++, C, Python, JavaScript

Web-Technologies : HTML, CSS, BootStrape

Frameworks : Spring Boot

Databases : MongoDB, SQL

Dev Tools : Visual Studio Code, Git, GitHub

EXPERIENCE

Technical Training / Practical Development Experience

October 2025 - Present

- Developed a library management application using **Spring Boot (Java)** to manage books, users and transactions.
- Implemented **CRUD** operations (create, read, update, delete) for book records — add new books, update book details, and delete obsolete entries.
- Designed and exposed **RESTful APIs** for book management and user operations, enabling future integration with web front-end or external clients.
- Configured the system to store data in a database (SQL / NoSQL — whichever you used), handling book metadata, user info, and transaction history.
- Used **version control with Git & GitHub**, managing code history, collaboration and project tracking.
- Followed modular and layered architecture (controller, service, repository layers) for maintainable and scalable code structure.

EDUCATION

Pimpri Chinchwad College of Engineering and Research(PCCOE&R), Pune
Bachelor of Engineering (B.E.) in Information Technology - Currently in Third Year

Expected Graduation: 2027

PROJECTS

Library Management System

Java, JDBC, MySQL, OOP, Git

[Source Code](#)

- Developed a web-based Library Management System using **Java** and **JDBC** for backend processing and database connectivity.
- Implemented core features including **book management, user records, and issue/return tracking**.
- Utilized **HTML** and **CSS** for user interface and improved user experience with organized navigation.
- Integrated **MySQL** for secure structured storage and performed CRUD operations efficiently.
- Used **Git** and GitHub for version control and project documentation.
